1.Create a Bucket in IBM object storage.

The screenshot displays the IBM Cloud Object Storage interface. The left sidebar shows the navigation menu with 'Buckets' selected. The main content area is titled 'Buckets' and includes a description: 'Buckets serve as containers for objects, and can be individually configured in terms of their location, resiliency, billing rates, security, and object lifecycle rules.' Below this is a table listing existing buckets. A 'Create bucket' button is located in the top right corner of the table area.

Name	Public access	Location	Storage class	Created	Resiliency
cloud-object-storage-6f-cos-standard-qbe	Yes	jp-tok	Smart Tier	2022-10-10 2:01 PM	Regional

3.Upload a css page to the object storage and use the same page in your HTML code.

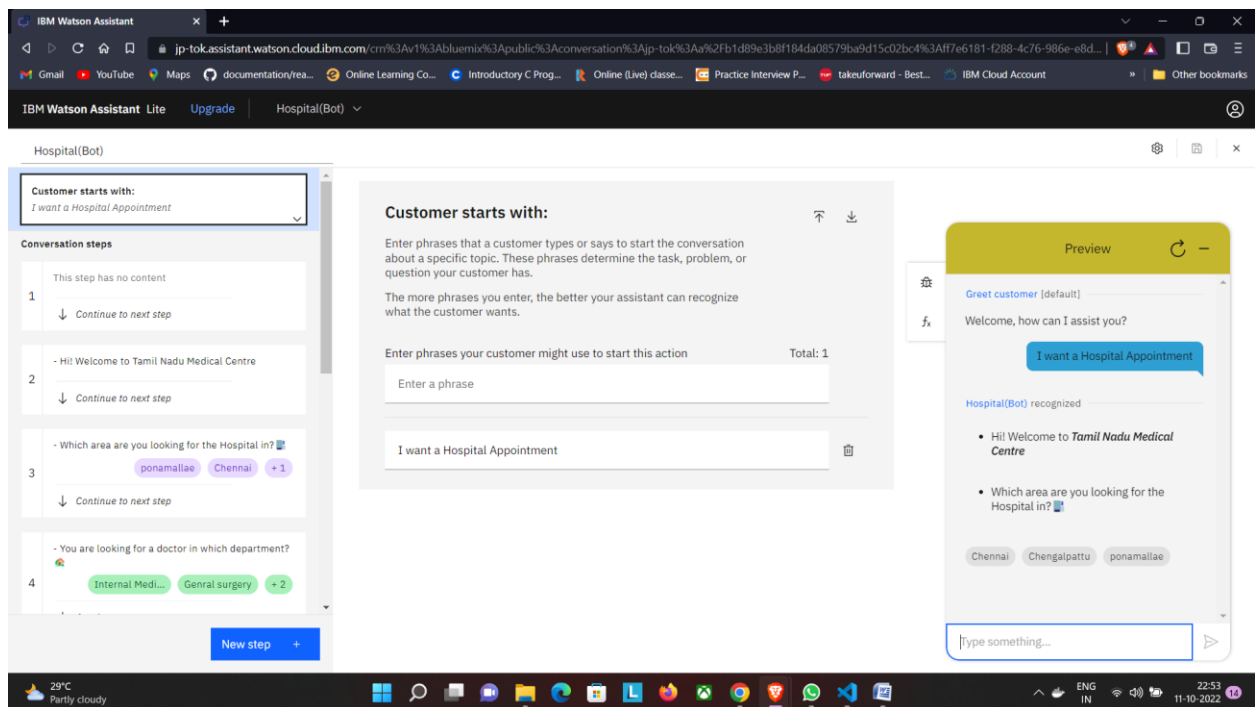

4. Design a chatbot using IBM Watson assistant for hospital. Ex: User comes with query to know the branches for that hospital in your city. Submit the web URL of that chat bot as a assignment.

HOSPITAL CHATBOT LINK:
